

Spare Corporate Protection™

Corporate Protection Products by Spare Backup, Inc.

Data Sheet

Web Interface Administrators Console: Edit User screen (top) and create Group Administrator screen (bottom).

Customizable Performance

Spare Backup, Inc. is the only company to offer a choice in automatic and selectable features to minimize the impact on desktop and laptop clients.

- **Backup Throttling:** Minimizes the CPU usage on slower machines.
- **Auto-Pause:** Automatically pauses the backup when user interaction is detected.
- **Bandwidth Throttling:** Ensures backups do not utilize the entire Internet bandwidth, slowing down other Internet intensive programs.

Corporate online backup: Secure, flexible, scalable, and simple to use.

Spare Corporate Protection™ products are designed with enterprise security in mind. The Spare Corporate Protection products provide online backup for business class desktops, laptops and Windows servers. This affordable suite of products allows system administrators to define business rules for protecting valuable corporate assets.

Corporate data is housed in Spare's state-of-the-art Tier 3 data centers or can be stored at the customers. Executives and System Administrators can rest assured that their data is protected and secure. Based on our proven backup technology in our home-based product, firewalls are not a problem, and the backups are secure and easily performed for the traveling executive or salesperson.

Easy to Use Web Interface

Based on Spare Backup's award winning web interface, this product allows system administrators to easily set configurations and define reporting capabilities. You can change status of the accounts, distribute license keys and change account passwords: all on an easy to use web interface.

Remote Data Backup

Loss of corporate data due to laptop loss is one of many problems facing today's leading edge companies. Spare Corporate Protection products have solved this issue with a cost effective, secure solution that is easy to manage and administer. Corporate Protection is the ideal solution for large Fortune 500 companies as well as smaller corporations. Security is the best in the industry with Spare's excellent Spare Key technology for clients as well as the RAID 6 data centers for protecting and archiving your corporate assets.

Flexible, Scalable Architecture

Built with a flexible architecture in mind, Corporate Protection products are the ideal solution for any size business...small, medium or large enterprise.

Data Encryption and Security Features

Files are encrypted (AES 256-bit encryption) before they are sent to the server and all client server communications is protected over a 128-bit SSL connection. Secure key encryption options let you manage your key to encrypt your data. Near continuous data protection detects and backs up your data as frequently as you desire.

Some of the files and folders Spare Backup selects automatically:

Microsoft Outlook®
Microsoft Outlook Express®
Microsoft Word®
Microsoft Excel®
Microsoft PowerPoint®
Microsoft Project®
Microsoft Visio®
Microsoft Access®
Internet Explorer®
Files in My Documents
Files in My Pictures
Files in My Videos
Files on the Desktop
Microsoft Money®
Peachtree®
Quicken®
QuickBooks®
Sage®
TurboTax®
And many, many more

Cost Effective, Unique Features

- **Multiple File Revisions:** Up to 5 revisions of each file stored allowing snapshots of historical changes.
- **True PC Data Archiving:** Spare is the only company that retains content forever even when a PC has deleted the content. Other competitors delete content after 30 days when that data is deleted on a local PC. With Spare Backup, backup copies can be retained until the user explicitly deletes them from the server. Spare is the only company to offer this choice.
- **Network and Server Backups:** Provides for backup on multiple servers including MS Exchange, SQL, other file servers and network or network mapped drives.
- **Flexibility in Supporting Clients:** Include Microsoft Windows Vista, XP, 64-bit Windows, and Mac OS X.
- **Open and Locked File Support:** There is no need to close files to back up...Spare Corporate Protection products backup open or locked files.
- **Client Security:** Highest security in client application; tightly controlled client key process allowing for the tightest control and protection of client content.
- **Secure World Class Data Centers:** The most secure, state-of-the-art, back office data protection available on the market using Tier 3 data centers. When drives are about to fail, predictive software determines the fail might occur and moves data to a new healthy drive to offer the ultimate in data protection.
- **Incremental Backups:** Incremental backups performed to conserve bandwidth including individual Outlook email backup.
- **Choice in Backup Location:** Spare offers choice in allowing customer to back up to their own data center or to back up to our Tier 3 data centers.

Support when you need it

24x7 support centers are available to answer your questions via live chat, e-mail, or phone support.

Pricing Plan Flexibility

Spare Corporate Protection products offer pricing and business model flexibility. If an enterprise wishes to house their data on their own data centers, Spare will provide hardware requirements and recommendations and offer software licensing and maintenance. Additionally, Spare offers corporations and small businesses the ability to outsource the complete corporate backup solution including data center management. The choice is yours!

About Spare Backup

Spare Backup, Inc. (OTCBB: SPBU) specializes in helping consumers, small office/home office users, and small to mid-sized businesses protect their computer data quickly, automatically and cost-effectively. The company's flagship Spare Backup product is the first totally automated online backup service that intelligently selects, secures and stores files without any user intervention, automatically backing up documents, email, music, photos and other PC files on a continual basis.

The Spare Backup service is a safer, simpler, and more secure way for small business users to backup their important files. Spare Backup initiates backups automatically. Users can easily restore files individually or all at once. The worry and expense of recovering data following accidental deletions, virus attacks, natural disasters or major power outages is virtually eliminated by Spare Backup.

With the addition of the newest Corporate Protection products, Spare Backup has solidified themselves as the leading backup company protecting against data loss.
